

How to use Google SMS:

1. Enter your query as a text message.
2. Send message to the 5-digit US shortcode **46645** (GOOGL on most phones).
3. Receive text message(s) with results (takes about a minute). May see multiple messages labeled “1of3”, “2of3”, etc.

For a help text message, send the word ‘help’ to 46645, or visit <http://sms.google.com>

Business listings from Google Local

- Enter business and include city and state, or zip
- To ensure getting Google Local results, put a period between business and location
- Examples: ‘pizza 94301’ OR ‘pizza palo alto ca’ OR ‘pizza.94301’

Prices from Froogle

- Enter ‘price’ or ‘prices’ along with the product name
- Examples: ‘price ipod 20gb’ OR ‘ipod 20gb prices’

Definitions

- Enter ‘define’ followed by the word or phrase
- Example: *define ubiquitous*

Remember...

- Get up to 3 results per query. Results may arrive as separate text messages.
- Messages may arrive out of order depending on wireless provider.
- Results should appear within a minute, but could take longer.
- You may get ‘no results’ if feature you’re requesting is not supported.
- View all Google SMS features at: <http://sms.google.com/howtouse.html>
